## 03 FAQ

### WHY ARE WE RUNNING THIS ROUND?

We want someone on the team who genuinely understands what's breaking through in agentic AI right now — not last year's news, this week's launches. The fastest way to test that is to put you in front of the firehose and see what catches your eye.

### WHAT IS PRODUCT HUNT?

A site where new products launch every day. Users upvote and discuss them. → [producthunt.com](https://producthunt.com)

### WHAT COUNTS AS AGENTIC AI?

AI that takes actions on its own — plans, uses tools, browses, writes code, executes multi-step work. Examples: Devin, Manus, Cursor, Claude Code, n8n agents. **Not agentic:** plain chatbots, image generators, prompt-wrappers.

### HOW DO I UPVOTE?

Click the orange triangle ▲ next to the product name on its page.

### WHAT IS A THOUGHTFUL COMMENT?

2–4 sentences. Mention a specific feature + your honest take. Avoid: "Awesome!", "Congrats team", emoji-only replies. Example: *"Interesting that the agent writes to a sandboxed shell instead of only calling APIs. Curious how you handle long-running tasks without timeouts."*

### WHERE'S MY PROFILE URL?

Avatar (top right) → View profile → copy URL. Looks like [producthunt.com/@username](https://producthunt.com/@username).

### WHAT DISQUALIFIES ME?

Empty PH profile · fewer than 10 upvotes/comments · generic comments · picks that aren't agentic · LLM-generated picks · missed deadline.

### HOW DO YOU VERIFY?

We open your profile and read your comments. If they look copy-pasted, you're out.
